

Superior durability in the heaviest traffic conditions.

Brite-Line® 2000 Intersection Pavement Marking Tape provides motorists with the most durable intersection grade markings on the heaviest traveled roadways. These tapes have superior durability, excellent nighttime reflectivity and resist wear-and-tear.

Product Benefits:

- Designed for the heaviest urban traffic conditions.
- Superior anti-skid design.
- Significant cost savings through dependable performance.
- Meets or exceeds all required quality standards.
- Engineered for superior daytime color and nighttime reflectivity.
- Readily available from nationwide distribution centers in standard sizes.

Application Benefits:

- Ideal for surface applied or inlaid applications.
- Unique adhesive system resists tearing or movement at intersections.
- Intersections may be opened to traffic immediately after application.

Material Benefits:

- Tough urethane surface for increased durability and color stability.
- Roll goods available in various widths and lengths, including metric sizes.
- Available in symbols, legends and custom orders.
- Yellow and white tapes conform to standard highway marking colors.

Manufactured in the U.S.A.
